

Quiz 8- Time to check your understanding of Stakeholder Management

1. What is the main purpose of stakeholder management for product managers?
 - a. To ensure alignment of expectations and goals with stakeholders
 - b. To minimize the risk associated with the product development
 - c. To manage customer complaints
 - d. To increase the profit margin of the product

Correct Answer: Option a – To ensure alignment of expectations and goals with stakeholders.

Explanation: The main goal of stakeholder management for product managers is to ensure that all stakeholders have a clear understanding of the product vision, goals, and plans, and that their expectations and priorities are aligned with those of the product team.

2. How can product managers effectively communicate with stakeholders?
 - a. By being transparent, consistent, and adapting communication styles to suit different stakeholders.
 - b. By avoiding communication with stakeholders.
 - c. By using technical jargon and ignoring stakeholders' feedback.
 - d. By keeping stakeholders in the dark about the product development process.

Correct Answer: Option a - By being transparent, consistent, and adapting communication styles to suit different stakeholders.

3. What are the challenges faced by product managers in stakeholder management?
 - a. Improving financial performance, increasing market share, and better employee morale.
 - b. Improving product design, increasing market share, and better stakeholder relationships
 - c. Increasing product sales, reducing customer complaints, and improving employee morale
 - d. Balancing competing stakeholder interests, managing conflicting expectations, and effectively communicating with stakeholders

Correct Answer: Option d – Balancing competing stakeholder interests, managing conflicting expectations, and effectively communicating with stakeholders.
